"As a dedicated and motivated individual, I am excited to transition my career into software development. With one year of experience from a software development bootcamp and Codecademy courses, I have honed my skills as a self-taught programmer through books and other resources. I am an organized and dependable candidate with a positive attitude and a proven track record of managing multiple priorities. My willingness to take on added responsibilities and meet team goals makes me an asset to any team. My background as a creative business owner in the auto repair industry has provided me with exceptional leadership skills, an engaging demeanor, and the ability to excel in demanding environments. I am also experienced in training and mentoring successful teams. I am looking to gain hands-on experience in a dynamic and collaborative work environment."
